Help

We checked it on Google Maps

When a customer finds you on Google Maps and taps "Order online", it takes them to **cantonadakebabct.com**. That page **does not open**: it shows a secure connection error and nothing loads.

A customer who finds you on Google **cannot see the menu or place an order**, so they go somewhere else.

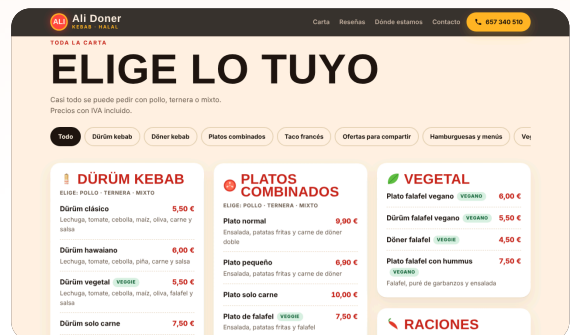

THAT'S WHY IT'S ON US

New website, free

~~250 €~~

0 €

included in the pack

- Custom design with animations, red and yellow like your menu
- Full menu with prices and filters
- Google rating and a button to leave a review
- "Find us" map with the nearest metro
- Buttons to call and message on WhatsApp
- "Open now" notice and Halal seal

If you want, online orders at no cost. We can add ordering to the website for **pick-up** or **delivery**, with orders arriving in the same kitchen as the tablets. We don't charge anything for this system. Only if customers pay by card online, the bank or payment provider takes its fee.

WHAT YOU ASKED FOR

Tablet ordering pack

COMPLETE PACK

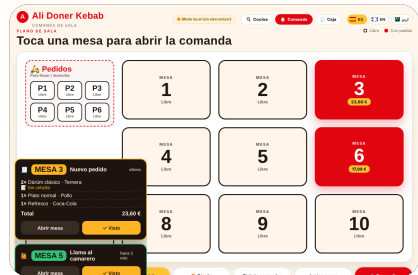

Complete tablet system + free website

~~590 €~~

260 €

one-time payment · no monthly fees

-56% · South Asian community discount

A tablet on every table

- Customers order themselves, straight to the kitchen
- 8 languages, including Arabic and Urdu
- Choose meat, quantity and notes ("no onion")
- "Call waiter" and "ask for the bill" buttons
- Shows what the table has already ordered

Kitchen and Till included

- Kitchen screen with pending orders
- Sound alerts from every table
- Table map and takeaway orders
- Cash or card payment, receipts
- History and end-of-day cash close

Also included

- The new website, free
- Your menu and prices already loaded
- Installation on the tablets
- 1 hour of staff training
- 30-day guarantee against faults

Menu changes

3

First 3 months: all changes free

Remove a dish, change a price, add a deal... anything you want. Call us or message us on WhatsApp and we do it at no cost.

After 3 months

Each update costs **30 €** and is done within 48 hours.

Tip to pay less

Write down everything you want to change and send it in one message. The whole list counts as **a single update** of 30 €.

Much cheaper than a subscription. Restaurant software with POS, waiter ordering and table ordering costs from about 119 € a month, plus 200–500 € setup: over 1,400 € in the first year.

ANOTHER OPTION

A panel to change it yourselves

Instead of paying us for each update, you can have your own **admin panel** and change the menu yourselves, whenever you want. This needs a real server, always on and protected.

OPTIONAL · ADDED TO THE PACK

Admin panel

- Change prices, names and descriptions
- Add or remove dishes and deals
- Mark a dish as sold out instantly

- Changes show at once on tablets, till and website
- Unlimited changes, no fee per change
- From your phone or computer

~~160 €~~

68 €

+ 28 €/month

server, security and maintenance

-57% · South Asian community discount

What the monthly fee includes

28 €/month

Your own server

A real server, dedicated to your restaurant.

Authorisation

Every change is checked on the server: no outsider can touch the menu.

Backups

If something is deleted by mistake, the previous menu is restored.

Username and password

Only people with access can log in.

Encrypted connection (HTTPS)

Nobody can read or alter the data on the way.

Security and support

Updates, monitoring and help on WhatsApp if anything fails.

Updates or panel?

	WITHOUT PANEL (WE DO IT FOR YOU)	WITH PANEL (YOU DO IT YOURSELVES)
Price	Included in the 260 € pack 590 €	+68 € once 160 € and 28 €/month
Changes	Free for 3 months, then 30 € per update	Unlimited, included
When they go live	Within 48 hours	Instantly
Best if...	You rarely change the menu	You often change prices or deals

The panel can be added whenever you want, including after the 3 free months. No minimum contract.

TABLETS AND COSTS

What you'll need

Cheap tablets (not included)

The system works on any tablet with a browser; nothing powerful is needed because it's only used for ordering. One per table and one for the kitchen and till (a phone or your existing computer also works).

OPTION	WHERE	APPROX. PRICE	NOTES
Second-hand tablet	Wallapop	20–30 €	Cheapest · check it works well
Basic 8" tablet	AliExpress	under 50 €	Ordering only · on sale
Teclast P30 · 10.1"	AliExpress	~69 €	Bigger screen · on sale
Xiaomi Redmi Pad 2 · 11"	AliExpress	~110 €	Good screen · for the till
igguall TP Easy 80 receipt printer	PcComponentes	62.99 €	Optional · receipts and cash drawer · 4.4/5

Approximate prices; they vary with condition and offers. Android 9 or newer is best. Each table needs a stand or a case with a stand, and tablets should charge overnight. We'll help you choose them and set them up so they only open the system.

Other costs (paid by the restaurant)

Website domain (e.g. alidonerkebab.es)	12–21 € a year
Hosting for the website and tablet system	0 €
Admin panel (only if you want it)	28 € a month

Also free with the pack

We fix the Google "Order online" button so it goes to the new website · QR code on every table with the menu · QR poster for leaving Google reviews.

Timeline

Tablet pack + website

1 to 2 weeks, with testing at the restaurant.

Admin panel

2 to 3 more weeks.

Terms

Payment

50% to start and 50% on delivery.

Guarantee

30 days: any fault fixed for free.
